

CROP - PANORAMA

M6. For the past few years, we have been witnessing a debate about the origins of life and even of the Earth. Some people believe that the Earth and life on Earth were created by God (or your notion of "God" if you don't belong to the Christian faith) in a few days, as taught by the Bible or other religious texts. Others believe that the Earth has existed for billions of years and that life appeared here as single cells that evolved to where we are today. Which one of these two points of view are you most inclined to believe?
