

Some of the *Creationists'* values and hot buttons

Great conservatism and strong valorization of institutional authority over society. A need for a form of leadership that shows strength and determination, and does not get hampered by “paralyzing” democratic mechanisms

Apocalyptic and fatalistic view of the world today; need for comfort, as well as comforting experiences and guidance

Very little socio-ethical sensibilities coupled with ecological alarmism. Great confidence in today’s industry and its processes

- Much stronger
- Stronger
- Weaker
- Much weaker
